DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 1, 8 and 15 recites the limitation "the actual packet type and actual port number fields" in line 8, 10 and 8, respectively. There is insufficient antecedent basis for this limitation in the claim.
4. Regarding claim 4, 11 and 18, the phrase "a first predetermined field" in line 2 renders the claim indefinite because it is unclear whether it is the same limitation as "a first predetermined location" in the parent claims (for example, claim 1 line 6) or not.
5. Regarding claim 5, 12 and 19, the phrase "a second predetermined field" in line 2 renders the claim indefinite because it is unclear whether it is the same limitation as "a second predetermined location" in the parent claims (for example, claim 1 line 7) or not.

Allowable Subject Matter

6. Claim 1, 8 and 15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

7. Claim 2-7, 9-14 and 16-21 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
8. The following is a statement of reasons for the indication of allowable subject matter: The prior arts in the record fail to teach or make obvious to a method comprising instructions including an instruction to a recipient to process the IPMP packet in accordance with an actual packet type and an actual port number included in a first and second predetermined location, respectively, rather than a faux packet type and a faux port number that are included in the actual packet type and actual port number fields within a structure of the claim. These features are claimed in the independent claims 1, 8 and 15 and render them allowable.
